

Quick Points

Fusion-Tech FIBER-COND UV Protected Faser Piping

- The most comprehensive 15-year warranty in the North American marketplace
- UV Protection is extruded integrally in the faser pipe
 - Highest grade of UV stabilizer available
 - No scrapping, peeling or special preparation required for welding
 - Can be welded directly to non-UV faser pipe
 - UV resistant pipe excellent for outdoor installation
- UV Protection is injection molded throughout the fittings
 - Highest grade of UV stabilizer available
 - No scrapping, peeling or special preparation required for welding
 - Can be welded directly to non-UV faser pipe
 - UV resistant pipe excellent for outdoor installation
- PP-RCT 125 Raw Material
 - Inert raw material is very “acid” resistant
 - Inert raw material is very “base” resistant
 - Abrasion resistant
 - Scale, corrosion and loading resistant
 - Abrasion resistant
 - Light weight
 - Highest pressure ratings in the industry
 - Highest temperature ratings in the industry
 - Homogeneous system prevents leaks and failure
 - Inert raw material produces no harmful or poisonous gas if burned
